

# Check Point Security Expert R70

## Check Point Security Expert R70

pureAdvantage  
CHECK POINT ATC

The Check Point Security Expert course provides an understanding of advanced concepts and skills necessary to configure Check Point Security Gateway and Management Software Blades. During this course, you will process a Change Request, implement Provisioning, and configure SSL VPN remote access. In addition, you will deploy HA, and configure your network for advanced routing features such as VTIs, while employing the Eventia suite for advanced reporting and monitoring options.

### Course Contents

- Define Management Portal aides
- Extend access to network policy settings
- Use SmartWorkflow to track, approve and audit Security Policy changes
- Assess policy life-cycle and change management
- Use SmartProvisioning as a centralized management tool
- Define SmartProvisioning deployment and management scenarios
- Use profile-based management
- Identify SSL VPN roles
- Assess security acceleration requirements
- Assess multi-core CPU with SecureXL benefits
- Identify High Availability limitations
- Set up multiple Security Gateway cluster configurations
- Use Advanced Routing protocols
- Apply Load Balancing configurations
- Produce network-traffic audit reports
- Apply intrusion event analysis
- Monitor and analyze alerts to track and identify network intrusions

### Target Group

- Systems administrators, security managers, or network engineers who deploy R70 Security Gateway deployments on open servers, IP appliances, UTM-1 appliances, or Power-1 appliances.
- Students who want to earn Check Point Certified Security Expert (CCSE) R70 certification

### Knowledge Prerequisites

Check Point Security Administration R70, or equivalent knowledge and experience
