

# Packeteer Advanced Traffic Analysis and Troubleshooting

The 3-day course aims to provide relevant advanced technical training that can be applied in the workplace to aid in improving network operation and performance.

The intended audience is IT professionals responsible for performing advanced traffic analysis and for troubleshooting network application performance problems.

This is a practical problem-solving course that is made up of 10 hands-on LABs. Instructor-led review, group discussion and LAB debriefing comprises 25% of the course.

Course content is based upon analysis of commonly reported problems. A certification exam is available for those taking this course as part of the Packeteer Certified Expert program.

## Course Contents

- Review of key concepts
- Advanced traffic management capabilities
- Problem investigation strategies
- Diagnostics and troubleshooting tools
- Troubleshooting traffic flow problems
- Troubleshooting PacketShaper configuration & corruption problems
- Troubleshooting PacketShaper hardware & software problems
- Troubleshooting PacketShaper performance & access problems
- Understanding PacketShaper capabilities & limits

## Target Group

Engineers and consultants who install and manage Packetshapers.

## Knowledge Prerequisites

Students must have attended the Packeteer PacketShaper Level I course or must have equivalent knowledge.

## Course Objectives

All course LABs are based upon a common scenario that allows students to monitor and troubleshoot the network of an international company who has deployed Packeteer solutions to manage its WAN based applications.

## Reservation and Registration
